Summary

GIS and Remote Sensing professional with 8+ years of experience supporting humanitarian, environmental, and public health operations. Skilled in operational geospatial support, spatial analysis, remote sensing, GIS database management, and decision support using ArcGIS and Google Earth Engine. Experienced in training and supporting multidisciplinary teams, delivering GIS capacity building sessions, and communicating technical information to non-technical stakeholders in complex operational contexts.

Education

MSc in Geographic Information Systems – Mutah University, 2022
Thesis: Permaculture and Ecological Lifestyle in Wadi Arab/Beir Mathkour

BSc in Agriculture Engineering (Land and Water Management) – Hashemite University, 2017

Experience

Humanitarian GIS Officer – REACH Yemen, Amman, Jordan, (2023 – 2025)

- Designed and implemented digital data collection systems using KoboToolbox, including questionnaire development, validation, and quality control to ensure high-quality humanitarian datasets
- Provided operational geospatial support to Public Health and Early Recovery teams through spatial analysis, remote sensing, mapping, and evidence-based decision support in complex humanitarian contexts.
- Lead national-level Site Suitability Analysis for the settlement based assessment project using ArcGIS and Google Earth Engine, integrating key indicators (IPC, flood hazard, VCI, LULC, accessibility).
- Supported project managers and senior GIS specialists in coordinating GIS activities, troubleshooting geospatial workflows, and ensuring alignment with operational needs.
- Developed and maintained geospatial databases ensuring data quality, standardization, and interoperability across multiple humanitarian projects.
- Designed interactive dashboards, web maps, and applications (ArcGIS Online, Experience Builder) to support real-time, data-driven decision-making.
- Translated complex geospatial outputs into clear insights for non-technical stakeholders through reports, visual products, and presentations.
- Delivered GIS training, technical guidance, and on-the-job support to field teams and partners, strengthening geospatial capacity and improving data quality and workflows.

Research – Information and Research Center – King Hussein Foundation, Amman, Jordan (2022 – 2023)

- Collected and managed field data for studies and reports.
- Coordinated research logistics including focus groups and field visits.
- Produced research summaries and supported data-driven publications

Project Engineer – Wadi Araba Development Co., Amman, Jordan (March 2020 – August 2020)

- Supervised irrigation and station rehabilitation projects.
- Conducted hydrogeological assessments for well-drilling feasibility.
- Created administrative plans and visual materials to support project goals.

Supervisor Engineer – Consolidated Consultants Group, Amman, Jordan (July 2018 – February 2019)

- Initiated and computed catchment areas across Jordan through surface water hydrology analysis — a first-of-its-kind effort in the country.
- Conducted suitability analysis for dam and pond locations.
- Supervised construction of Al-Salhieh Earth Pond.
- Delivered ArcGIS training sessions to Jordan Valley Authority staff.

GIS Officer- MWI Jordan Valley Authority, Amman, Jordan (February 2017 – June 2018)

- Introduced and implemented ArcMap to manage land use and GIS-related processes within the Investments Unit.
- Took responsibility for handling and processing all land-related transactions using GIS tools.
- Developed and maintained spatial datasets, and conducted field inspections to verify coordinates of stakeholders on site.
- Prepared reports, memos, and documentation for directorates regarding land use and investor requests.
- Provided geospatial analysis to support decision-making and improved efficiency of workflows.
- Coordinated with other departments to facilitate data sharing and enhance GIS usage within the unit.

Consultancies

GIS & Remote Sensing Consultant – Royal Scientific Society Amman, Jordan, (Oct2025 – Present)

- Led geospatial and remote sensing analyses to support the Land Degradation Neutrality (LDN) project.
- Produced and interpreted LULC, Land Productivity, and SOC indicators using satellite data.
- Designed and delivered analytical maps and spatial insights to guide national land degradation criteria.
- Facilitated stakeholder and community workshops to promote participatory assessment processes.
- Enhanced the integration of GIS and remote sensing tools for environmental monitoring and decision-making.

Research Specialist – Sama Consulting 2023-2025

- Conducted field data collection through surveys, key informant interviews, and community-level assessments.
- Facilitated focus group discussions (FGDs) with diverse participants to capture qualitative insights.
- Supported data analysis and report writing, ensuring accuracy and clarity of findings.
- Contributed to projects such as the Elderly Population Study, including research design, tool development, and drafting reports.
- Applied ethical, participatory, and quality-driven approaches throughout all research stages.
- Act as Lead Consultant for national-level assessments, responsible for designing methodologies, coordinating research activities, and ensuring alignment with project objectives.

Eco Consultant – 2023

- Facilitated a women's focus group in Tafileh Governorate for local communities around the Daehan Wind Power Project.
- Presented project impacts, Corporate Social Responsibility initiatives, and grievance mechanisms, ensuring clear communication to participants.
- Encouraged interactive discussions and documented feedback to support stakeholder engagement and community awareness.

International Center for Agricultural Research in Dry Areas ICARDA – 2022

- Enhanced and documented spatial datasets and metadata for Central Asia (Uzbekistan, Tajikistan, Kyrgyzstan).
- Developed maps and improved geodatabase integration.
- Delivered final report with dataset inventory, mapped resources, and recommendations.

Certifications and Courses

- Advanced Data Analytics program, 2025
- Esri MOOC: Cartography, 2020, Imagery in Action, 2023, Spatial Data Science, 2023, GIS for Climate Action, 2023.
- GIZ: Principle of Dams Design and Earth Ponds, 2019
- Network Analysis Using GIS, 2020
- Integrated Food Security Phase Classification (IPC), 2023
- Building Better Response, 2023

Core Skills & Competencies

- **GIS & Spatial Analysis:** ArcGIS Pro, ArcGIS Online, QGIS, Cartography, Spatial Analysis, 3D & Terrain Analysis, Geospatial Database Management.
- **Remote Sensing:** Google Earth Engine, NDVI, VCI, Land Use/Land Cover Classification (Supervised & Unsupervised), Hydrological and Environmental Analysis.
- **Data & Analytics:** R, Power BI, SQL, Excel, Mobile Data Collection, Geo-referencing, Data Quality Assurance & Validation.
- **Humanitarian & Operational Applications:** Humanitarian GIS, Public Health Mapping, Emergency Response Support, Site Suitability Analysis, Environmental & Agricultural GIS, Evidence-based Decision Support
- **Capacity Building & Coordination:** Training & On-the-job Coaching, Stakeholder Engagement, Participatory Sessions, Project Coordination, Technical Reporting & Knowledge Translation for Non-Technical Audiences

Languages

- Arabic – Mother Tongue English – Professional Working Proficiency.
